

OB0-106

BEA

BEA SOA Foundations Exam

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your OB0-106 exam in first attempt and also get high scores to acquire BEA certification.

If you use OfficialCerts OB0-106 Certification questions and answers, you will experience actual OB0-106 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our BEA exam prep covers over 95% of the questions and answers that may be appeared in your OB0-106 exam. Every point from pass4sure OB0-106 PDF, OB0-106 review will help you take BEA OB0-106 exam much easier and become BEA certified.

Here's what you can expect from the OfficialCerts BEA OB0-106 course:

- * Up-to-Date BEA OB0-106 questions as experienced in the real exam.*
- * 100% correct BEA OB0-106 answers you simply can't find in other OB0-106 courses.*
- * All of our tests are easy to download. Your file will be saved as a OB0-106 PDF.*
- * BEA OB0-106 brain dump free content featuring the real OB0-106 test questions.*

BEA OB0-106 certification exam is of core importance both in your Professional life and BEA certification path. With BEA certification you can get a good job easily in the market and get on your path for success. Professionals who passed BEA OB0-106 exam training are an absolute favorite in the industry. You will pass BEA OB0-106 certification test and career opportunities will be open for you.

Question: 1

Which of the following provides the best definition of SOA?

- A. SOA is a software engineering paradigm that prescribes the creation of loosely coupled interfaces between the consumers of functionality and the applications that represent that functionality.
- B. SOA is a collection of technologies like enterprise service bus and Web Service management that facilitate the delivery of enterprise functionality as a set of services.
- C. SOA is an IT strategy that organizes the discrete functions contained in enterprise applications into interoperable, standards-based services that can be combined and reused quickly to meet business needs.
- D. SOA is a collection of standards, best practices, architectural models, and software development methodologies, principally based on Web Services, which may be incorporated into enterprise software engineering to provide information technology to an enterprise in a standards-based way.

Answer: C

Question: 2

When is SOA NOT an appropriate strategy? (Choose all that apply.)

- A. When the applications in a given enterprise are necessarily stand-alone, and thus would not benefit from a shared services approach.
- B. When the political boundaries among lines of business and their related IT functions are insurmountable, making sharing of functionality as services impossible.
- C. When the information systems in a given enterprise are homogeneous from a technological perspective and thus the sharing of functionality among them is essentially built into their construction.
- D. When enterprise business processes are widely distributed across the information systems for separate lines of business and are embedded in the integration among those systems.
- E. When application lifecycles are very short, and thus the effort to share functionality among them cannot be offset by gains from reuse.
- F. When a given enterprise has dozens or hundreds of information systems for which the exposing of functionality from those systems as services would be an extremely complex operation.

Answer: A, C, E

Question: 3

The aims of an SOA Program include: (Choose all that apply.)

- A. The establishment of governance to standardize the way that functionality is delivered and deployed for use by the entire enterprise.
- B. The delivery of enterprise architecture that facilitates the sharing of functionality as services in a way that is measurable and manageable and meets operational goals.
- C. The establishment of governance to standardize the way that enterprise information systems are coded.
- D. Providing accountability to the business for the translation of business requirements into information technology.
- E. The synthesis of business strategy and goals and the delivery cycles of projects into a roadmap for the creation and deployment of shared services.
- F. The development of any service that is to be delivered to the enterprise.

Answer: A, B, D, E

OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
