E20-370

EMC

Networked Storage – CAS Implementation

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your E20-370 exam in first attempt and also get high scores to acquire EMC certification.

If you use OfficialCerts E20-370 Certification questions and answers, you will experience actual E20-370 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our EMC exam prep covers over 95% of the questions and answers that may be appeared in your E20-370 exam. Every point from pass4sure E20-370 PDF, E20-370 review will help you take EMC E20-370 exam much easier and become EMC certified.

Here's what you can expect from the OfficialCerts EMC E20-370 course:

** Up-to-Date EMC E20-370 questions as experienced in the real exam.*
** 100% correct EMC E20-370 answers you simply can't find in other E20-370 courses.*
** All of our tests are easy to download. Your file will be saved as a E20-370 PDF.*
** EMC E20-370 brain dump free content featuring the real E20-370 test questions.*

EMC E20-370 certification exam is of core importance both in your Professional life and EMC certification path. With EMC certification you can get a good job easily in the market and get on your path for success. Professionals who passed EMC E20-370 exam training are an absolute favorite in the industry. You will pass EMC E20-370 certification test and career opportunities will be open for you.

Question: 1
The customer's Centera is using CentraStar 3.0.
A third-party vendor implemented an application and requested that a virtual pool and profile be created on the Centera. The application fails in its attempt to write to the Centera. What is a possible problem?

A - CE + is enabled so no data can be written to the Centera
B - PEA tile was never provided to the application
C - Replication wasn't turned on
D - Storage pool creation not completed

Answer: B

Question: 2
What is the maximum number of nodes in a Gen 4 Centera Cube?

A - 4
B - 8
C - 16
D - 32

Answer: C

Question: 3
Clips need to be migrated from the default pool to a virtual pool. An access profile has already been created. Sequence the following steps to migrate clips:

1) Grant the profile access to the pool
2) Create application virtual pool
3) Start migrating pool mappings
4) Set the home pool for the access profile
5) Create pool mapping

A - 2, 4, 1, 5, 3
B - 2, 5, 4, 1, 3
C - 2, 1, 4, 5, 3
D - 2, 1, 5, 4, 3

Answer: A

Question: 4
What is an "unbundled" cluster?

A - Flexible solution where the customer chooses any configuration of hardware or software to deploy
B - Hardware only solution where the software is provided by the customer
C - Software only solution where the hardware is provided by the customer
D - Solution where the customer provides the rack in which the cluster is installed

Answer: D

Question: 5
What does SDK Failover enable with the default setting?

A - If a C-Clip cannot be found on the primary cluster, then the request goes to the secondary

cluster
B - If the communication is interrupted to the primary Centera, all data is rewritten to the secondary Centera
C - If the pool has reached its defined quota then data is written automatically to the default pool
D - In case of a disk failure, data is written automatically to a node connected to the other power rail

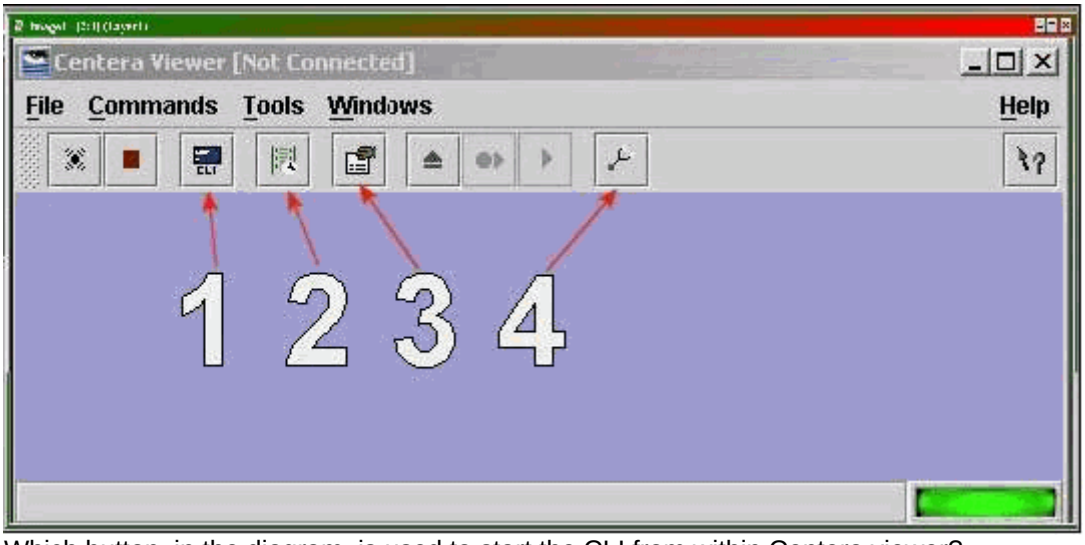
Answer: A

Question: 6
How do you launch the CUA Monitor?

A - Connect Monitor and keyboard directly to the CUA node and launch web services
B - Start a http session to the IP-address of the CUA using port 16000
C - Start a https session to the IP-address of the CUA using port 7227
D - Starting a SSH session to the IP address of the CUA and use the function “M” in the menu

Answer: C

Question: 7
Click the exhibit button.



Which button, in the diagram, is used to start the CLI from within Centera viewer?

A - 1
B - 2
C - 3
D - 4

Answer: A

Question: 8
What are the available Centera replication topologies in addition to Uni-Directional and Bi-Directional?

A - Chain and Inward Star
B - Multipoint to Point and Chain
C - Point to Multipoint and Link

D - Ring and Star

Answer: A

Question: 9
A new customer has been testing their Centera in Governance mode. They have specified retention periods ranging from 0 days to 7 years. They would now like to erase the cluster and put it into production. How can the customer remove the test data from the cluster?

A - Customer can issue a reset cluster command from the CLI
B - Customer can switch the cluster off for 24 hours to delete all data
C - Customer can use the privileged delete command to remove the data
D - Can not be done. data remains on the cluster

Answer: C

Question: 10
With which enterprise backup solutions does CASbar work?

A - NDMP compatible systems
B - NDMP systems with DMA capabilities
C - Systems capable of mounting a UNIX file system
D - Systems capable of mounting a windows file system

Answer: D

Question: 11
How can an application get authenticated by the Centera?

A - Application sends the Pal-file encrypted to Centera as part of the connection process
B - Connect string contains IP-Address of one or more access nodes, and a valid pair of name and secret
C - Send IP address of all access nodes and correct subnet mask as part of the connect string
D - System administrator has to set an environment variable, which points to the location of the PAl-module

Answer: B

Question: 12
By default, how many different file sizes does Centera Verify use to perform tests?

A - 1
B - 2
C - 3
D - 4

Answer: C

Question: 13
What is the primary benefit of the GM naming scheme?

A - Combination of the MD5 plus SHA-256 hash algorithms
B - Containerizes small files for increased performance
C - Faster for both ingest and cluster operations
D - Single Instance Storage
