HP

Advanced SAN Architecture

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=HP0-438>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your HP0-438 exam in first attempt, but also you can get a high score to acquire HP certification.

If you use pass4sureofficial HP0-438 Certification questions and answers, you will experience actual HP0-438 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our HP exam prep covers over 95% of the questions and answers that may be appeared in your HP0-438 exam. Every point from pass4sure HP0-438 PDF, HP0-438 review will help you take HP HP0-438 exam much easier and become HP certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial HP HP0-438 course:

- * Up-to-Date HP HP0-438 questions taken from the real exam.
- * 100% correct HP HP0-438 answers you simply can't find in other HP0-438 courses.
- * All of our tests are easy to download. Your file will be saved as a HP0-438 PDF.
- * HP HP0-438 brain dump free content featuring the real HP0-438 test questions.

HP HP0-438 certification exam is of core importance both in your Professional life and HP certification path. With HP certification you can get a good job easily in the market and get on your path for success. Professionals who passed HP HP0-438 exam training are an absolute favorite in the industry. You will pass HP HP0-438 certification test and career opportunities will be open for you.

QUESTION 1:

Which are two of the most important considerations when deciding to expand a fabric?
Select TWO.

- A. maintain the original fabric topology
- B. maintain the original data access needs
- C. expand the fabric for maximum bandwidth
- D. expand the fabric for maximum connectivity
- E. expand the fabric so that it supports future growth

Answer: B,E

QUESTION 2:

Before merging a fabric in a high-available redundant SAN environment with B-Series switches, you change conflicting zoning configurations and domain IDs. What else must you do in case of a mismatch to avoid fabric segmentation?

- A. Adjust the name table entries for one switch at a time.
- B. Adjust the buffer-to-buffer credits settings in one fabric at a time.
- C. Adjust the Core PID parameter bit settings in one fabric at a time.
- D. Adjust the TCP/IP subnet address settings for one switch at a time.

Answer: C

QUESTION 3:

What is the consequence of merging a zoned fabric with a non-zoned fabric?

- A. The fabrics do not merge. They segment and require manual intervention.
- B. Devices that were in the non-zoned fabric are not accessible until they are added to the currently enabled configuration.
- C. Devices in the fabric are not accessible until the devices in the non-zoned fabric are zoned and made part of the effective configuration.
- D. Any devices that were in the non-zoned fabric are automatically configured into a new zone as part of the effective configuration so they can function.

Answer: B

QUESTION 4:

A SAN administrator has an existing test SAN based on 1 Gbps B-series SAN switches with zoning. To evaluate the compatibility of 1 Gbps and 2 Gbps switches, the

HP0-438

administrator powers on a 1 Gbps and a 2 Gbps SAN switch (factory default settings without zoning). An ISL is then installed between the two switches. The administrator notices that the fabric segments. What are two possible causes of the segmentation? Select TWO.

- A. The zoning information is incompatible.
- B. The core PID parameters are conflicting.
- C. The new switch has a conflicting domain ID.
- D. The two switches are not at the same firmware version.
- E. The speed on the port must first be set for 1 Gbps operation.

Answer: B,C

QUESTION 5:

Which two factors affect the merging of SANs? Select TWO.

- A. IP addresses
- B. SNMP configuration
- C. zone naming standards
- D. switch fabric parameters
- E. switch naming standards

Answer: C,D

QUESTION 6:

A SAN consists of two cascaded switches with no free ports and one ISL. The SAN administrator intends to add a new switch and cascade it off one of the existing switches. What is the recommended procedure?

- A. Shut down the SAN and recable it with the new switch.
- B. Use the ISL to connect the two existing switches to the new switch.
- C. Shut down one of the existing switches and recable with the new switch.
- D. Attach the new switch to the least critical device port and recable the SAN.

Answer: D

QUESTION 7:

What is required to consolidate two fabrics with B-Series switches in a Meta SAN with some common storage? Select TWO.

- A. MP Router
- B. fabric merge
- C. proxy devices

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
- **Lifetime** login access.
- Unlimited download, no account expiry, no hidden charges, just one time \$99 payment.
- **Free updates** for Lifetime.
- **Free Download Access** to All new exams added in future.
- Accurate answers with explanations (If applicable).
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions, Answers and Study Guides are downloadable in **PDF** format.
- Audio Exams are downloadable in **MP3** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
