- A - Schemas are more widely used.
- B - Schemas are described with XML syntax.
- C - Schemas are used to validate documents on content as well as data types.
- D - Schemas are capable of using namespaces.

Answer: A

Question: 5

An application is designed to allow a customer to order concert tickets through a Web Service, If all other factors are identical, which scenario is LEAST likely to be appropriate for this application?

- A - Asynchronous Messaging
- B - Request/Response
- C - Remote Procedure Call
- D - Conversational Message Exchange

Answer: A

Question: 6

Which Web Services specification is most similar to a Java interlace?

- A - UDDI
- B - SOAP
- C - WSDL
- D - ebXML

Answer: C

Question: 7

The APIS used with JAXM applications are defined in which packages?

- A - javax.xml.messaging
- B - javax.xml.soap
- C - javax.xml.rpc
- D - javax.xml.registry

Answer: A, B

Question: 8

An XML document that is valid:

- A - complies with XML syntax rules and the constraints described in a DTD or Schema.
- B - complies with XML syntax rules but not the constraints described in a DTD or Schema.
- C - does not necessarily comply with XML syntax rules but only the constraints described in a DTD or Schema.
- D - does not necessarily comply with XML syntax rules or the constraints described in a DTD or Schema, but can be parsed with an HTML browser.

Answer: A

Question: 9

Which of the following is NOT a major element used to define a service in WSDL?

- A - Types
- B - Message
- C - Port type
- D - Service
- F - Namespace

Answer: E

Question: 10

Which two scenarios will always result in the init method of a servlet being invoked?

- A - Every time a new client accesses the servlet
- B - When the server automatically reloads the servlet
- C - When an HTTP INIT type request is made by a client
- D - When the servlet is put into service after loading and instantiation

Answer: B, D

Question: 11

It four classes were instantiated in the following order, implementing the associated event listener, in what order would they be notified if the application were shut down?

CustomConnectionManager implements HttpSessionListener
CustomerManager implements ServletContextListener
OrderManager implements HttpSessionListener
ShoppingCartManager implements HttpSessionListener

- A - ShoppingCartManager, OrderManager, CustomerConnectionManager, CustomerManager
- B - ShoppingCartManager, CustomerManager, OrderManager, CustomConnectionManager
- C - CustomerManager, ShoppingCartManager, OrderManager, CustomConnectionManager
- D - CustomerManager, CustomConnectionManager, OrderManager, ShoppingCartManager

Answer: A

Question: 12

What is the best scope in which to store an object containing display data that is to be sent from a servlet acting as a controller to a JSP page with the session disabled?

- A - page
- B - request
- C - session
- D - application/servletContext

Answer: B

Question: 13

Which of the following is considered the best way to design a flexible API that does not require a servlet per activity?

- A - Embed the activity name in a hidden field. Let the servlet read the field to determine what must occur.
- B - Create a query string containing the activity name as a parameter. Let the servlet read the parameter to determine what must occur.
- C - Use a servlet mapping to make requests with the same suffix. Change the prefix to the action and let the servlet read the whole URL to determine what is required.

Answer: C

Question: 14

Which interface should an object implement in order to be notified that it is about to be added to or removed from the session?

- A - HttpSessionBindingListener
- B - HttpSessionActivationListener
- C - HttpSessionAttributeListener
- D - EventListener

Answer: A

Question: 15

A client has accessed a servlet via a form that uses an HTTP POST request. Which two methods could be used by the servlet to obtain information input within the form?

- A - Using the servlet object's getServletInfo method
