Constructing Enterprise-level Switching Networks

Visit: <http://www.pass4sureofficial.com/exams.asp?examcode=GB0-323>

Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your GB0-323 exam in first attempt, but also you can get a high score to acquire Huawei certification.

If you use pass4sureofficial GB0-323 Certification questions and answers, you will experience actual GB0-323 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Huawei exam prep covers over 95% of the questions and answers that may be appeared in your GB0-323 exam. Every point from pass4sure GB0-323 PDF, GB0-323 review will help you take Huawei GB0-323 exam much easier and become Huawei certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Huawei GB0-323 course:

- * Up-to-Date Huawei GB0-323 questions taken from the real exam.
- * 100% correct Huawei GB0-323 answers you simply can't find in other GB0-323 courses.
- * All of our tests are easy to download. Your file will be saved as a GB0-323 PDF.
- * Huawei GB0-323 brain dump free content featuring the real GB0-323 test questions.

Huawei GB0-323 certification exam is of core importance both in your Professional life and Huawei certification path. With Huawei certification you can get a good job easily in the market and get on your path for success. Professionals who passed Huawei GB0-323 exam training are an absolute favorite in the industry. You will pass Huawei GB0-323 certification test and career opportunities will be open for you.

Exam Name:	Constructing Enterprise-level Switching Networks		
Exam Type:	Huawei		
Exam Code:	GB0-323	Total Questions:	300

Question: 1

STP is a routing protocol.

- A. True
- B. False

Answer: B

Question: 2

Which of the following statements is right about 802.1x ports? ()

- A. 802.1x supports the port-based authentication only.
- B. The ports of authenticator fall into controlled ports and uncontrolled ports.
- C. Uncontrolled ports always forward bi-directionally whether the authentication is passed or not.
- D. Controlled ports transmit EAPOL protocol packets only.

Answer: B, C

Question: 3

By default, among the switches in a bridging network, the one with the minimum MAC address will be selected as the Root bridge.

- A. True
- B. False

Answer: A

Question: 4

By default, among the switches in a bridging network, the one with the best performance will be selected as the Root bridge.

- A. True
- B. False

Answer: B

Question: 5

On H3C middle-end/low-end switches, once a bridge receives two BPDUs with the same Root bridge ID, the same root path cost and the same transmitting bridge ID, there are two parallel links between the two bridges. ()

- A. True
- B. False

Answer: A

Question: 6

On an H3C middle-end/low-end switch, once a bridge receives two BPDUs with the same Root bridge ID, the same root path cost, and the same transmitting bridge ID, there are two ports of the transmitting bridge connected to one physical segment. ()

- A. True
- B. False

Answer: A

Exam Name:	Constructing Enterprise-level Switching Networks		
Exam Type:	Huawei		
Exam Code:	GB0-323	Total Questions:	300

Question: 7

Multiple Spanning Tree Protocol (MSTP) is defined in ().

- A. 802.1d
- B. 802.1q
- C. 802.1w
- D. 802.1s

Answer: D

Question: 8

MSTP implements load balance on multiple trunk links for different VLANs. ()

- A. True
- B. False

Answer: A

Question: 9

Which of the following MST instances can be processed by MSTP? ()

- A. CIST
- B. IST
- C. MST
- D. MSTI

Answer: B, D

Question: 10

In MSTP, one VLAN can be mapped to multiple MSTIs. ()

- A. True
- B. False

Answer: B

Question: 11

Which of the following statements is right about unicast, multicast and broadcast? ()

- A. Unicast is applicable to point-to-point communications, and the receiver of unicast packets can be a single host or a gateway.
- B. Multicast is applicable to point-to-multipoint communications, and the receiver of multicast packets can be multiple hosts or gateways.
- C. Broadcast is applicable to point-to-multipoint communications, and the receiver of broadcast packets can be all hosts or gateways in the network.
- D. A host just passively receives the unicast, multicast or broadcast packets.

Answer: A, B, C

Question: 12

In a point-to-multipoint network, either unicast or multicast can be adopted. In comparison, which of the following advantages does multicast provide? ()

- A. Multicast uses less IP address resources.

Pass4SureOfficial.com Lifetime Membership Features;

- Pass4SureOfficial Lifetime Membership Package includes over **2500** Exams.
- **All** exams Questions and Answers are included in package.
- **All** Audio Guides are included **free** in package.
- **All** Study Guides are included **free** in package.
